## SUMMARY

Georgia Tech M.S. Computer Science student (AI specialization) with experience across software development, AI automation, IT support, and customer-facing operations. Advanced from sales assistant to AI automation engineer at Cherians Inc., building a customer support assistant and an AI-backed inventory system, and helped build a healthcare communication hub at HIPnation.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, SQL, HTML5, CSS3
**Development:** React, Flask, REST APIs, MySQL, relational schema design, Git, GitHub, SDLC, code review
**AI & Automation:** OpenAI API, Claude API, RAG, knowledge bases, chatbots, workflow automation, NLP, prompt engineering
**Data & Analytics:** Pandas, data visualization, A/B testing, operational reporting, business analysis
**IT & Support:** Hardware and device troubleshooting, POS systems, Chromebooks, networking fundamentals, data privacy
**Tools:** VS Code, Figma, Netlify, Zendesk, Aircall
**Business:** Customer service, sales operations, e-commerce, affiliate and social media marketing

## EXPERIENCE

**Georgia Institute of Technology** – Atlanta, GA — Sep 2026 – Present
*Public Services Student Assistant*

- Keep library technology and resources accessible to students, faculty, and visitors by providing front-line support and troubleshooting hardware, devices, and peripherals.
- Maintain accurate records for technology and multimedia lending equipment by handling circulation, condition checks, charging, inventory tracking, and basic maintenance under privacy procedures.

**Bloom & Bow** – Remote — Jul 2026 – Present
*Founder, shopbloomandbow.com*

- Launched and operate an independent online business end to end, owning product design, fulfillment, customer service, the website, and social media marketing.

**Cherians Inc.** – Decatur, GA — Aug 2025 – Sep 2026
*AI Automation Engineer (advanced from Sales Assistant)*

- Supported daily sales operations, customer inquiries, and administrative tasks, and kept checkout running by setting up and troubleshooting POS systems and devices.
- Automated responses to common customer questions about products, orders, and store policies by building an AI-powered support assistant in Python with the OpenAI API, backed by a searchable knowledge base.
- Reduced stockouts and inventory counting errors across 100+ grocery products by building an end-to-end inventory management system that tracks incoming stock, outgoing products, and sales.
- Let employees check stock levels, product movement, and sales in plain language by adding a Claude-powered assistant that uses retrieval-augmented generation (RAG) over the store's records.

**HIPnation** – Alpharetta, GA — Jun 2026 – Aug 2026
*Junior Developer Intern, Healthcare Communication Platform*

- Identified repetitive data entry, handoff delays, and visibility gaps across 5 patient-communication systems (Zendesk, Aircall, Elation EHR, email, and spreadsheets) by working with care team members to map their daily workflows.
- Consolidated task tracking, patient information, filters, and workflow status from 5 separate systems into a single view by helping build a Communication Hub application, reducing fragmented work for clinic staff.
- Scoped automation for 4+ workflow areas (task creation, status synchronization, referral tracking, reminders, and reusable ticket templates) by turning stakeholder feedback and patient-data privacy requirements into a concrete proposal.

**DeKalb County School District** – DeKalb County, GA — Feb 2026 – Jun 2026
*Paraprofessional*

- Kept instruction on track across multiple classrooms by supporting digital learning tools and classroom technology, including Chromebook hardware and educational software troubleshooting.

**Amazon** – Remote — May 2025 – Jul 2025
*Affiliate Marketing (Self-Employed)*

- Promoted Amazon products to an online audience through affiliate links and content as an independent affiliate marketer.

## EDUCATION

**Georgia Institute of Technology** – Atlanta, GA — Aug 2026 – Expected May 2028
Master of Science in Computer Science, Specialization in Artificial Intelligence

**Georgia State University** – Atlanta, GA — May 2023 – May 2026
Bachelor of Science in Computer Science | GPA: 3.6 | Dean's List (Fall 2023 – Spring 2026)
Relevant coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Operating Systems, Cybersecurity

## PROJECTS

**StudyBestie** – *Productivity Dashboard* (studybestie.live) Spring 2026

- Shipped a live productivity dashboard from concept to production as a solo developer by owning design, development, testing, and deployment end to end.
- Keep the app stable for live users after launch by handling troubleshooting, maintenance, and iterative updates without a separate engineering team.

**Derme** – *Skincare Safety Web App* Fall 2025

- Reached 99% accuracy across the ingredient and safety dataset by designing normalized SQL schemas for a React and Flask app that flags potential allergens in skincare products.
- Kept a five-person team's codebase integrated and reviewable by managing Git and GitHub version control, code review, and merges.

**Mind Guard** – *AI Mental Health Platform (Hacklytics 2025)* Spring 2025

- Delivered real-time, personalized mental-health insights from user input by building a Python and Flask backend that runs NLP sentiment analysis.
- Increased user engagement by 25% by iterating on features based on user feedback, and presented the working MVP at Hacklytics 2025.

**Personal Portfolio** – *Website with Chatbot* (amnayousuf.netlify.app) Spring 2026

- Automated responses to about 80% of visitor inquiries by adding an LLM-powered chatbot and contact workflow to a responsive portfolio site that works across all mobile screen sizes.

**Employee Management System** – *Full-Stack CRUD Application* Spring 2025

- Made employee, role, and organizational records easy for administrators to create, update, and retrieve by building a full-stack CRUD application on a structured data model.
